

Korolev Sergey Pavlovich was born 30 December 1906 in Zhytomyr. On the slide, you can see house, where he was born, and was living the first year and a half. Later he was live in Kiev.

When he turned 14, he was keen on aircraft industry and he became known as a young and experienced plane crafter. On the slide, you can see the plan, which he made, and young Sergey Pavlovich on nearly photo.

The most difficult stage of Korolev's life is his staying in prison. He went to prison because of false denunciations. No one checked the truth and he went to jail. On the slide, you can see how he had changed after 2 years staying in jail.

After these difficulties, he continued to work and he made the first artificial satellite of the Earth and in 1957 launched into space. Also in 1961 occurred the first human flight into space on the spaceship, which you can see in the slide, now the copy of this rocket stay in the VDNH.

The flights of people into space did not stop there several more people visited space during the scientist's lifetime. These were Valentina Vladimirovna Tereshkova, Alexey Arkhipovich Leonov.

In addition, Korolev wanted to conquer the moon and Mars, but he got sick and did not have time to fulfill his dreams.

Korolev was die in 1966. He was be a great scientist so in Moscow a street Akademika Koroleva was named after him and in Moscow and other cities you can see many monuments like as a photo in slide. It is an important street because in this street are locate Ostankinskay tower and telecenter, also here is locate the Korolev's home which now is museum. By the way, I live near Akademika Koroleva Street and I know more about Korolev and I sure that Korolev is a great scientist.

That is all I wanted to say. Thanks' for your attention.
